*Subject to sighting of the new moon **Eid ul Adha

MOON INFORMATION: We attempted after Maghrib Salah to look for the moon on the evening of the 10th. Majority of the UK was cloudy and although it was clear in Birmingham there was no reported sighting. However we have confirmed reports from Reunion, South Africa and Zambia that Moon has been seen, as these nations inform us of correct actual sighting (Muhaqqaq Ru'at e Basri) we have accepted their testimony and will commence the Month of Dhul Hijjah on 11th Dec and will be celebrating Eid on 20th December.

Saudi Arabia have once again claimed to have sighted the Moon before it was even Born. This is the worst case in recent history of a sighting and goes against their pre calculated Umm al Qura calendar. It would seem apparent that the most significant events in the Islamic year have been spoilt by the authorities to mislead the Masses.
